You Will Learn How To:

- ◇ **Identify issues affecting your project's budget and/or schedule early enough to make adjustments before they become severe**
- ◇ **Control a cost overrun whether you track hours or dollars**
- ◇ **Set indicators to monitor your project's performance throughout the project life cycle**
- ◇ **Control and eliminate impacts that cause schedule delays**
- ◇ **Maintain the integrity of the plan so that you can accurately respond to "how much" and "how long"**
- ◇ **Confidently analyze and precisely report a project's status as Red, Yellow, or Green**
- ◇ **Eliminate subjective and arbitrary status updates from the project team**
- ◇ **Contribute to your organization's goals by providing essential data for effective decision making**
